

Candidate: Alex Megalos

Riding: Delta

- 1. Many communities don't know how much climate change is costing them at present, and will cost in the future. Will you commit to putting systems in place to identify and track those costs?**

Yes I will. Identifying the cost within my community is anything that is to be spent on our sea wall. and yes there are more.

- 2. Will you work to develop and implement climate adaptation plans to reduce the harm that climate change causes in your community? How will you fund climate adaptation?**

No answer

- 3. Will you commit to protecting taxpayers by seeking to recover a fair share of climate costs from the fossil fuel companies who profit from selling products that result in greenhouse gases? Specifically, if elected, would you ask your Council to:**

- a. Send Climate Accountability letters from your community to major fossil fuel producers demanding that they pay their fair share of local climate costs caused by their activities and products?**

Yes.

- b. Press the province of BC to enact Liability for Climate-related Harms laws to give municipalities and others greater legal certainty, lower costs and timely resolutions if they sue to recover climate damages from fossil fuel companies?**

Yes.

- c. Explore legal action against fossil fuel companies to recover a share of local climate costs?**

Yes.

- 4. In your view, why is it important (or not) to hold fossil fuel companies accountable for your community's climate costs?**

When they take an active part in or community, even if it is doing business here in Delta they are responsible for there part. When companies are getting benefits, and other cost cutting measures from higher government, that means here on the lower government we want what they owe.
