

Candidate: Carol Doyle

Riding: Gibsons

- 1. Many communities don't know how much climate change is costing them at present, and will cost in the future. Will you commit to putting systems in place to identify and track those costs?**

I will work with my colleagues to determine how this could be undertaken in our community.

- 2. Will you work to develop and implement climate adaptation plans to reduce the harm that climate change causes in your community? How will you fund climate adaptation?**

Funding new projects or all small communities is a big issue. However, climate change is of concern for all citizens so we would have to be creative in our thinking to come up with a plan that works for our community.

- 3. Will you commit to protecting taxpayers by seeking to recover a fair share of climate costs from the fossil fuel companies who profit from selling products that result in greenhouse gases? Specifically, if elected, would you ask your Council to:**

- a. Send Climate Accountability letters from your community to major fossil fuel producers demanding that they pay their fair share of local climate costs caused by their activities and products?**

No answer

- b. Press the province of BC to enact Liability for Climate-related Harms laws to give municipalities and others greater legal certainty, lower costs and timely resolutions if they sue to recover climate damages from fossil fuel companies?**

Yes.

- c. Explore legal action against fossil fuel companies to recover a share of local climate costs?**

Yes.

- 4. In your view, why is it important (or not) to hold fossil fuel companies accountable for your community's climate costs?**

No answer
